

Functions: First & Second Derivatives

Graph each $f(x)$ and its $f'(x)$ and $f''(x)$. (Extend graphs to edge of grid). Complete each table of values.

Draw tangents on $f(x)$ at $x=-2$, $x=0$, $x=2$. Identify the Local Extrema, Concavity & interval, and Points of Inflection for $f(x)$.

1. $f(x) = x^2 - 3$
